## Issue:

The cans may leak fluid or the plastic child-resistant cap may become loose / come off. As these are toxic products as indicated on the label, a loose child-resistant cap or can leak could result in unintentional exposure to the chemical product and could lead to serious injury.

We have not received any reports of injury regarding the use of the product.

## What to do:

Even if your can is not leaking or the cap is intact, consumers should immediately stop using the products and safely dispose of them in accordance with local municipal hazardous waste requirements.
